### PerfectRoof

**PerfectRoof** The liquid applied, cast in place, waterproof membrane and energy saving Green roofing solution that pays for itself and lasts a lifetime.

**What makes it unique?** This laminate system comprised of our Nano-polymers, Polytex fabrics and Top Sealer is the least expensive, most cost effective, green, renewable, waterproofing membrane ever made.

**How does it work?** Beautifully! Resins field tested for over 40 years, combined with groundbreaking proprietary nano-technology and forward thinking, has created this hybrid roofing solution ideal for these times.

**What makes it special? PerfectRoof**

is not a coating, or failure prone cured membrane with leaky seams, terminations and penetrations. This seamless membrane is tailor made on site for your roof. It applies directly to and performs consistently with all existing substrates and resinous coatings, regardless of formulation or composition.

**What are the benefits of PerfectRoof?**

- Lowest life-cycle cost of any membrane system in the world
- Low initial investment/Eligible for energy savings and tax breaks
- Virtually height-less & weightless / Applies directly to existing systems
- Performs under the harshest wind, temperature and water conditions
- Installs with less labor, expense, danger, and mess than membranes
- Converts every deck material into an Energy Star rated "Green" roof
- Integrated seamless, flexible flashings system and roof in one
- Performs well in hail, mold, and salt spray environments
- Seals and reinforces parapet walls and coping stones
- Renewable indefinitely/Never needs to be removed
- Withstands U.V rays/ Excellent solar reflectivity
- Remains flexible & will not crack
- Class "A" fire rated
- Tints to any color

**PerfectRoof The bright, watertight, "Roof for Life !"**
